B2B SaaS Target Lead List & Signal Scoring

Handshake AI Skills Studio × Clay GTM Infrastructure Project Report

Target Ideal Customer Profile (ICP):
"High-growth B2B SaaS companies in North America & Europe with 50–500 employees that recently raised Series A–C funding and are actively expanding customer acquisition and sales engineering teams."

1. Executive Summary & GTM Strategy

This report documents an automated outbound prospecting engine configured in **Clay**. Rather than treating sales as static contact databases, this workflow pairs precision firmographic filters with dynamic buying triggers (**Signals**) to prioritize accounts at their peak propensity to purchase.

2. Buying Signal Selection: Sales Leadership Hiring & Expansion

• **Selected Trigger:** Recent Sales / GTM Leadership Hiring & Headcount Expansion (New VP of Sales, Head of Growth, or RevOps Leader appointed in last 90 days, or 3+ open AE/SDR roles).
• **Strategic Rationale:** New sales leaders enter with an aggressive 90-day pipeline generation mandate, fresh software budgets, and an urgent need to ramp reps fast without manual research bottlenecks.
• **Defensible Anatomy:** Every pick requires: (1) Verified Trigger Event, (2) Timestamp within last 90 days, and (3) Defensible Source Evidence.

3. Top 5 Ranked Target Accounts (Dated & Ready to Act On)
